Re: LightSquared Subsidiary, LLC  
Ex Parte Communication. IB Docket No. 11-109  
IBSF File No. SAT-MOD-20101118-00239

Dear Ms. Dortch:

As a frequent user of high-precision GPS, I am writing to voice my strong opposition to the FCC's granting of a license to LightSquared. LightSquared is blatantly ignoring the data obtained from recent independent testing which clearly shows that LightSquared's proposed high-speed data network will interfere with high-precision GPS. If LightSquared is granted a license, not only will the land surveying industry be harmed, but so will the general public who use the data that land surveyors produce. LightSquared should not be allowed to move forward until it is definitively shown that their plan will not interfere with high-precision GPS on which the entire population of the United States relies.

Thank you for your attention in this extremely important matter.

Sincerely,

Travis J. Niederhofer, PLS
